

Introducing Toilet-iQ

Live Remote Monitoring

Instant Toilets & Showers Toilet-iQ system brings artificial intelligence into your toilet or ablation block, delivering peace of mind to Project and Site Managers by eliminating potential hazards and risks associated with self contained units.

Toilet iQ has been designed to offer live monitoring of a toilet or ablation block anywhere* (providing 4G or WIFI with internet connectivity is available). With Toilet-iQ you have the ability to not only monitor the status of the waste tank but you can control how you want to be alerted (SMS/Email) and when.

Toilet-iQ also offers the ability to

- Shut off the incoming water supply to stop a unit from being used
- Turn off interior/exterior lighting
- Lock external doors to stop people from accessing the unit

For more information on purchasing this for your next project or adding it your hire please contact our team on 1300 556 241 or sales@instantproducts.com.au
